WORK EXPERIENCE

IT Service Desk Consultant

Ithaca, NY

Ithaca College

August 2023 - May 2026

- Triaged and resolved **over 700 tier-1/tier-2 technical incidents** across campus using **TeamDynamix**, maintaining high first-contact resolution rates and reducing escalation overhead.
- Managed user credentials and account status using **Active Directory**, executing password resets, account unlocks, and deactivations to restore user access quickly while maintaining domain security.
- Resolved **MFA** lockouts and enrollment issues using **Duo Admin**, verifying user identity and restoring system access without bypassing security controls.

Endpoint Tech Consultant

Ithaca, NY

Ithaca College

May 2024 - May 2026

- Supported campus-wide hardware refresh cycles and device deployments using **Microsoft Intune** and **Jamf Pro**, configuring and replacing **100+ endpoints** for faculty and staff.
- Maintained and troubleshoot hardware and software issues on college-owned **Windows** and **macOS** systems across faculty offices, labs, and specialty spaces.
- Managed physical IT asset inventory and service request documentation using **TeamDynamix**, maintaining accurate hardware tracking and lifecycle logs.

LABS & TECHNICAL PROJECTS

Active Directory & IAM Lab | *GitHub*

- Deployed **Windows Server 2025 in Azure**, promoting the instance to a root Domain Controller (lab.local) and managing ADUC identity structure.
- Automated user onboarding and **Group Policy (GPO)** baselines using **PowerShell**, enforcing 12-character passwords and 15-minute screen locks across **5 OUs**.

Splunk SIEM Log Analysis & Monitoring Lab | *GitHub*

- Architected a log collection pipeline using **Splunk Enterprise** on **Ubuntu** and **Splunk Universal Forwarder** to ingest Windows Event Logs over port 9997.
- Authored custom **SPL queries**, security dashboards, and automated alerts for **Windows EventIDs (4624, 4688, 4740)** to detect brute-force and lockout anomalies.

Nessus Vulnerability Assessment & Remediation Lab | *GitHub*

- Executed **credentialed vulnerability scans** across Windows Server targets using **Nessus Essentials**, analyzing CVSS severity metrics.
- Remediated high-risk vulnerabilities via PowerShell by disabling **SMBv1** and **TLS 1.0**, validating risk reduction through follow-up rescan reports.

SKILLS

Systems & Cloud Administration: Active Directory (AD), Microsoft Azure / Entra ID, Microsoft Intune, Jamf Pro, Azure VMs, Proxmox, Hyper-V, Windows Server, Office 365, Nextcloud, Veeam

Networking & Security: pfSense, Wireshark, Nmap, Nessus, IDS/IPS, Duo Admin (MFA), Splunk, Elasticsearch, Zabbix, NIST CSF

Protocols & Virtualization: OSPF, EIGRP, BGP, SNMP, Docker, LAMP Stack

Programming & Scripting: PowerShell, Python, SQL, Java, JavaScript, HTML/CSS

Operating Systems & Ticketing System: Windows, Linux (Debian, Arch) | ServiceNow, TeamDynamix

CERTIFICATIONS

CompTIA Security+ | Google Cybersecurity Professional Certificate

EDUCATION

Ithaca College: Bachelor of Arts in Computer Science | Minor Graphic Design
